

NAD & PRA1 DNA TESTING
*******BOTH TESTS NOW AVAILABLE TOGETHER*******

Many of you have asked when you would be able to test your dogs for NAD and PRA1 at the same laboratory. We are pleased to announce that you can now do just that! And you have multiple choices of laboratories in several countries. Two of the laboratories (Biofocus and Paw Print Genetics) are not quite ready to offer the NAD DNA test, but will be doing so very soon. For your convenience, we have compiled a list of those laboratories that offer (or will soon offer) both NAD and PRA1 DNA testing for Papillons and Phalènes. We have also included their regular price for the test. Most of the laboratories offer various discounts (seasonal discounts, flash sales, combination discounts, club discounts, health clinics, litter discounts, etc.), which you can learn about from their websites or by contacting the laboratory directly. All of these laboratories will provide DNA test kits and prepaid return shipping with your order, unless otherwise noted. Here is an alphabetical list:

- **Biofocus Germany:** Currently offers the PRA1 DNA test for €53,55, but has told us that they will offer the NAD DNA test “in the near future.” Website: biofocus.de
- **EVG Slovenia:** Offers both PRA1 and NAD DNA tests for €48,80 each or €97,60 for both tests, if ordered together. They are in the process of upgrading their website, so the “Combi” price for both tests may not yet be shown. Website: eurovetgene.com
- **Genomia Czech:** Offers both PRA1 and NAD DNA tests. PRA1 price is €65,34 and NAD price is €62,92 or the “Combi” price for PRA1/NAD is €108,90. Website: genomia.cz
- **GenSol USA:** Offers both PRA1 and NAD DNA tests for \$USD40.00 each. Shipping costs are additional. Website: gensoldx.com
- **LabGenVet Canada (Laboratory of Veterinary Genetics, University of Montreal):** Offers both PRA1 and NAD DNA tests for \$CAD70.00 each or a “Combi” price of \$CAD130.00 (\$CAD65.00 each) for both tests. Website: labgenvet.ca
- **Laboklin UK:** Offers both PRA1 and NAD DNA tests for £48.00 each (includes 20% VAT). Website: laboklin.co.uk
- **Laboklin Germany:** Offers both PRA1 and NAD DNA tests for €59.50 each (includes 19% VAT). Website: laboklin.de
- **OptiGen USA:** Offers both PRA1 and NAD DNA tests for \$USD\$75.00 each or the “Combi” price of \$USD130.00 (\$USD65.00 each) for both tests. Website: optigen.com
- **Orivet Australia:** Offers both PRA1 and NAD DNA tests for RRP price of \$AUS75.00 plus GST for each test or \$AUS67.50 plus GST for each test for Registered Users (10% discount). Website: orivet.com
- **Paw Print Genetics USA:** Currently offers the PRA1 DNA test of \$USD80.00, but are working of final development of the NAD test, which should be available soon. Website: pawprintgenetics.com
- **VetGen USA:** Offers both PRA1 and NAD DNA tests for \$USD65.00 each for each dog or \$USD58.50 each, if ordered together for the same dog. Website: vetgen.com

These prices are valid as of September 2017. We are not responsible for changes in prices or offers. We encourage you to check if prices have changed and for any available discounts before you place your order. Information collected by Stephanie Koeniger & Alla Jenkins.
